Technical Skills

Languages : Python, C++, JavaScript (ES6+), TypeScript, SQL
Front-End : HTML, CSS,SaaS, Tailwind CSS, Chakra UI, React.js, Redux, React Router, Vue.js, Responsive Design
Back-End : Node.js, Express.js, Socket.io, Mongoose, Firebase, REST APIs
Databases: MySQL, PostgreSQL, MongoDB
Others: Git, GitHub, Git Bash, Data Structures, Stripe, APIs, Bash

Experience/Projects

Findev (https://findev-q050.onrender.com/)   **Dec '24**
GitHub Explorer, React.js, Tailwind CSS, Node.js, GitHub API

- **Developed a GitHub explorer** used by 500+ developers to browse profiles and repositories, simplifying discovery by 40%.
- **Implemented repository insights and advanced filters**, allowing users to explore and sort repositories efficiently, reducing search time by 25%.
- **Designed a responsive and modern interface**, optimized for all devices, improving mobile user satisfaction by 20%.

Flux (https://flux-59yw.onrender.com/)   **Nov '24**
Social Media Platform, React.js, Tailwind CSS, Node.js, MongoDB

- **Built a dynamic social media platform** supporting 1,000+ users, with features like customizable profiles, personalized feeds, and real-time notifications, boosting engagement by 40%.
- **Integrated advanced search and discovery tools** for profiles, posts, and hashtags, reducing search time by 30%.
- **Enhanced user experience** with dark mode, strong moderation tools, and a seamless interface, improving usability and safety for 95% of users.

QuickCart   **May '24**
E-Commerce Platform, React.js, Stripe, MongoDB

- **Created an online shopping platform** serving 500+ users with real-time product listings, improving convenience and reducing checkout time by 20%.
- **Integrated secure Stripe payment processing**, enabling 200+ monthly transactions and ensuring a 98% user trust rate.
- **Automated invoice generation** for all transactions, streamlining the purchasing process and enhancing record-keeping efficiency by 30%.

LinkUpp   **April '24**
Real-Time Messaging Application, React.js, Node.js, WebSocket, MongoDB

- **Developed a real-time messaging app** supporting 100+ users with 99% uptime, enhancing communication reliability and user satisfaction by 40%.
- **Implemented secure authentication and online status indicators**, boosting user confidence and engagement.
- **Added message timestamps and history storage**, ensuring efficient conversation tracking and context retention for users.

Education

Tkr College of Engineering	**Pursuing('26)**
Bachelor of Technology (B.Tech) in Computer Science	*Hyderabad,TS*
St. Mary's Junior College	**98.8%**
Shree Swaminarayan Gurukul International School	**95.4%**
